CLIPS, QUOTES & COMMENTS - A-5 - August 31, 1953

MISCELLANEA:

Concerning Essayist GERALD HEARD pg.1  
Ascent of Mt. Everest - (New Age Interpreter) pg 1  
Storms and Atoms (Clip, and our private info.) pg.1-2  
Planet Behind the Moon - pg.2  
Distressing Hospital Situation .... pg. 2  
Don Green Reports on Bugs pg.2.  
Aerial Detonations .. pg. 2  
Pyramid Effects - Associate Hepner - a possible lead.pg 2-3  
Hoxsey Treatment - "The Seventh Sense" (new book) - pg. 3  
Q-Energy Film  
Ethereic Kidnappings ("Man-to-Man" article & Comments) pg.4  
More About PYRAMID Experiments -- pg. 4  
Release from Air Intelligence Center - and -  
Instructions re sighting of Aeroforms. pgs. 5-6

\* \* \* \* \*

CQC is distributed bi-weekly by the Borderland Sciences  
Research Hdqrs., 3524 Adams Ave., San Diego 16, Calif.  
12 issues (6 mo.): \$5.00 -- 6 issues (3 mo.) \$2.50. Two  
issues \$1.00.

GERALD HEARD - Yes, he has. Along with some very trashy journalism in the Scottish newspapers he did an interesting book ("Is Another World Watching?") - though unnecessarily infested with bees and ants, and now appears with a two-page article in FORTNIGHT for August 17, '53. On the plus, positive or credit side Mr. Heard accepts the existence of the Discs or Saucers and finds their preliminary caution very understandable. He then goes on to repeat the details of a Disc landing in Germany, and about the "monster" seen near Flatwood, W.Va. The Brush Creek landing (described in last RR) also seems plausible to him. "We have to follow the most difficult of mental disciplines", says Mr. Heard, "that is, to keep an open mind. . . It is not true that there is no evidence that no one is inside the saucers... The possibility of coming into contact with another form of life that is intelligent and far ahead of us is too promising for us to lose..."

So far so good - but it is less than encouraging to note that this nibbling half-acceptance is the best that can be offered us by one of the most brilliant essayists of our time.

(Cr. J.R. LePage)

ASCENT OF MT. EVEREST: Editor Theodore Helene sees the 'conquest' of New Age Interpreter Everest in its widest significance, as symbol and product of awakening cosmic energies now August 1953. being released into the life of our planet.

There is an "accelerated liquidation of planetary karma" and the successful ascent is a 'group achievement with historical timing and in harmony with Nature.' ... There is also an interesting quotation from Col. Lindbergh's article in Sateve Post, about the phantoms and the voices that accompanied him on his long flight (issue of May 30, '53). Editor Helene writes with scholarship and maturity of thought and sounds a refreshingly optimistic note. If not a subscriber to the Interpreter, send .20 for the August issue - or better still, \$1.00 for 5 issues, to NEW AGE PRESS, 1544 Cerro Gordo St., Los Angeles 26, Calif.

STORMS & ATOMS: Rep. James E. VanZandt, member of the Joint Congressional Committee, is lately quoted as saying: "In one of the recent tests in Nevada they did get some reaction from the standpoint of weather. It would be a breach of security to say which test this was or just what weather phenomena took place. I think definitely that these blows can be traced to the recent series of tests in Nevada." The Committee Chairman of course "rejected" such "speculation" for the epidemic of devastating storms. -- In this connection, see the article by our Associate Edw. S. Schultz in Round Robin IX-2 (July-Aug.). The "ex - ports" as unanimous in this denial as they were (past tense) in denying the existence of the Discs or saucers.

(Clip from Mrs. H. Clemens).

Our private info. is to the effect that the Air Force now believes that the Discs (etc.) are "from other planets" - and that their policy of evasion and denial has been a mistaken one. Their questionnaire for sightings may be had from the Air Technical Intelligence Center, Wright-Patterson Air Force Base, Ohio; attention of Barbara P. Hanawalt, 1st Lt. USAF. Assist. Adjutant. Their press release admits that about

20% of all reported sightings cannot be attributed to natural and familiar causes - and denies that any secret weapon or aircraft known to the Defense Department is concerned in the matter.

AN ODDITY probably worth mentioning: One of the alleged occupants of a Disc which landed in Nevada said that they and their craft came from "a planet which lies behind the moon" (hence invisible to us) -- and some four or five years ago one of the M.P. Controls asserted the existence of such a planet. Since that time the Controls have added, that small discs which made forced landings in Mexico "came from the moon". Others, however, are described as "popping out like smoke rings" from mother ships - origin of latter not stated (other than 'etheric').

DISTRESSING; An item so distressing that we hate to quote it, comes in the form of a newspaper clip (UP Aug. 12, '53), sent us by Assoc. Dorothy M. Casta. A 52-year old Newburyport (Mass.) man has been confined in the Bridgewater State Hospital for 40 years as a result of "mistaken identity." The attorney for the for the State Youth Service board lists this man as "one of 210 persons illegally committed to Bridgewater as defective delinquents" A total of 365 in that classification are held there. The unfortunate referred to is still there. Question: What and Why is a psychiatrist?

DON GREEN REPORTS ON BUGS: Mr. Green, who writes The Lantern articles for Round Robin, & has a similar column in TALK OF THE TIMES, collects bug-facts in the July issue of the latter magazine. 'Locusts in Syria, grasshoppers in California, giant water bugs in Washington, gypsy moths on 25,000 acres in N.Y. State. tent caterpillars in the same State, and in New Jersey, Minnesota, Wisconsin, Washington, Georgia, and Maine. Serious infestation of army worms in 10 States, with heavy crop losses; crickets and hoppers on 2500 miles of 13 States - 70,000 acres have been overrun. Sphinx caterpillars destroying quinine trees in the Belgian Congo. . .'

(TALK OF THE TIMES can be reached at Box 1467, San Diego 12, Calif. Copy .40.)

DETONATIONS: Referring again to DON GREEN'S LANTERN in last Round Robin (ix-2); Assoc. D.G. expressed great scepticism about the alleged explanation of over - head concussions (as due to diving jet planes at a distance). We have a letter from Assoc. John B. Morgan (1411 Summit Ave., St. Paul 5) citing cases where gunfire and thunder were heard at a distance but reportedly NOT heard 'in between'. We agree that under unusual and optimum conditions this probably takes place - but think that the frequency of these detonations within the last two years points to new conditions of some kind. One would need a great amount of data (unobtainable), to come to any reasoned conclusion - but our info. is, that these sounds result from a kind of crepitation in the very dense ethers which the planet is now entering - the kind of sound made by bending huge plates of metal. . . As with many other recent and remarkable phenomena, single or even several instances are almost useless for working out an explanation. . . We are always glad to have such comments as those by Assoc. Morgan - whether favorable or unfavorable to ideas offered by BSR.

"PYRAMID EFFECT" This is for brief mention only, of a letter received from Assoc. G.S. Hepner, (1113 W. Chicago Ave., Chicago 22). Subject: effect of small paper pyramid on edge of a razor blade. "I go on record that it "works" with metallic-backed paper but not with plastic, says Assoc. Hepner. According to Assoc. Verne Cameron (discoverer of the effect), and your Director, it works with ordinary paper and cardboard - but maybe metallic backing or metal alone would be still bet-

ter. Much work remains to be done in studying this effect, and we shall try to summarize present data and make a few suggestions, either in next CQC or in next Round Robin (end of September).

For the moment we suggest that perhaps the principle employed in some types of magnetic separators may be involved, so far as the effect on metallic edges is concerned. There is probably a kind of magnetic field set up within the pyramid, and putting the blade inside introduces a metallic "core". The stress lines set up may turn back the microscopic fold-over of the blade edge - which is not really dulled or worn off. Microscopic examination of the blades should determine this.

This is a possible "lead" - but what about the fact that food-stuffs, meat and vegetables - kept under the pyramid do NOT decay, but are mummified - dried up? Samples of ground raw beef and suet, put under a  $8\frac{1}{2} \times 8\frac{1}{2}$ " paper pyramid 3rd of this month (August) have not decayed and give off NO decay odor up to date (Aug. 25); but the control samples, kept near the pyramid, same temperature but not covered in any way, decayed rapidly and had to be thrown away on the 4th day. The pyramid is by no means air-tight and the bottom is simply the flat surface of the tray. Some of Assoc. Cameron's experiments indicate that certain saprophytes (both vegetable and animal) avoid the pyramids and try to escape from beneath them.

The matter of keeping a razor blade sharp indefinitely may be trivial to everyone except the manufacturer, but the preservation of food-stuffs is not trivial, and the principle involved may have far-reaching applications. We would like to have reports from our Associates.

The Beacon Light Herald for June, 1953, prints a four-page article by Harry M. Hoxsey, N.D. (Hoxsey Cancer Clinic, 4507 Gaston Ave., Dallas, Tex.) entitled "Medical Dictatorship in this Country". This is one more document in the long and overwhelming indictment of the American Medical Association. "My only wish" writes Dr. Hoxsey "is that every reader of this article will write to their Senator and Representative demanding an open investigation of the Hoxsey treatment, for the benefit of the one out of every eight persons - alive today - that Medical Might has doomed as sure victims of cancer . . ." For reprints of the article send to Wm. Kullgren, Atascadero, Calif. Price .10 each, \$2.00 for 100.

The Seventh Sense is the title of a new book by Kenneth Roberts, who wrote "Henry Gross and his Dowsing Rod", and so brought down a storm of ridicule and criticism. The ignorance and prejudice displayed by orthodox scientism toward water dowsing and radiesthesia generally, has to be experienced to be believed. The Seventh Sense gives a witty and biting account of a year's activity of Water Unlimited, and may be had from Campbell's Book Store, 10918 Le Conte Ave., Los Angeles 24. Price \$4.00 plus .14 sales tax. (Please do NOT order from BSRA)

Q ENERGY FILM; We hope within the next few weeks to be able to offer our Associates, through the BSRA, a booklet entitled THE Q-ENERGY FILM - Its Discovery, Research, and Application. This remarkable therapeutic product (external use) has been developed by ORIGINALITY HOUSE (480 Avalon Ave, Akron 20, Ohio) and is backed by a decade of study and experiment. Its credentials are therefore excellent and the standing of ORIGINALITY HOUSE cannot be questioned. The film itself will be sold at the Akron Hdqrs., while the booklet will be distributed through BSR Hdqrs. (\$1.00) We consider it a privilege to cooperate in offering this inexpensive and valuable product to our Associates and to the public.

#### ETHERIC KIDNAPPINGS:

"Man to Man" magazine for October '53 prints a 3-page article under the title "Are the Flying Saucers Kidnapping Humans?" A heading of this sort of course presupposes the "yes" answer, otherwise there would be nothing to write about - and this time the yes is at least 50% correct. Such data as we have (BSR), plus info.

from the M.P. Controls, is to the effect that these "takings" of human beings, animals, and sometimes objects have been going on for ages; but it is probably quite wrong to charge up all of this against the "Saucer people" - as the Man-to-Man magazine does. The Guardians are said to be very benevolent; we are told they have occasionally abducted earth people for the purpose of colonizing other planets, but that these "earthlings" are much happier and better off as a result. But as we have repeatedly pointed out, there appear to be many kinds of people and many types of 'ether craft' overhead - and some of them would be dangerous were it not for the police-power of the Discs or Guardians. Even so, the fact of the "takings" has long been recognized in 'certain quarters' -

But not publicised and sensationalized. Even with our comparatively small mailing list, what to print and what to 'include out' is often a problem. The facts included in the article referred to should be known or accessible to people who can 'take it' - but what will be the effect on people who cannot?

We shall try to print a little more on this subject in our next Round Robin, including a letter from Associate Elsie Keith, of Miami, Fla., who sends us the clip from Man to Man magazine. -- We are often reproved both for what we print and for what we do NOT print. If any of our Associates want to free their minds on that subject in a short paragraph or two, we'll print that all right - on asbestos if necessary.

As mentioned heretofore, there will be occasional small duplications of material between CQC and Round Robin. An example of this is the inclusion of two pages on the press release from Air Intelligence Hdqrs., re the aeroforms. We're sending this out now in order to get the sighting methods into the hands of Associates without waiting nearly a month for RR - but it will appear in RR also, because not all RR readers take the CQC. . . But it will probably go into RR as insert pages, so the usual amount of reading matter in RR will not be decreased.

Assoc. Verne L. Cameron tells us, that he is very doubtful whether the orientation of the pyramid (one face north) has much or any bearing on the effects, either on razor blades or on food stuffs - but he thinks the proportions (approximate) are important, and also that a four-sided pyramid is necessary - triangular forms will not do. For his razor blade (more than 100 shaves to date) he uses a paper pyramid with a 25" base (each side) and the angle line (slope line) 24". This is larger than necessary for small objects, but the ratio of 25:24 is about  $6\frac{1}{4}$ :6 - and a pyramid  $3\frac{1}{8} \times 3$  is large enough for razor blades and small food samples.

Assoc. Cameron also disclaims responsibility for the item about effect of pyramids on saprophytes (which we attributed to him), but says it was derived from an article in an English publication. He has no data himself on this - but the investigation should certainly be pursued.

INQUIRIES: The Eason Lectures, plus a lengthy list of other publications, can be obtained from The Periscope Pub. Co., 57 Bloor St. W. Toronto 5, Ontario, Canada. Ask for their Book List.

FLYING SAUCERS HAVE LANDED is the title of a book by Assoc. Desmond Leslie, & co-author George Adamski. Printed by T. Werner Laurie Ltd., 1 Doughty St., London, WC 1. Price 12 s/ 6 d -- about \$2.00. We have not yet received a copy of this book but hope to review it later.

\* RADIONIC RATE FOR POLIOMYELITIS REPORTED AS 300 B: ATTENTION OF ALL DOCTORS! \*  
\* This has just been reported to us by Dr. N.K. Edgars, Director of the Doctors \*  
\* Group Polyclinic, 916 West Broadway, Whittier, Calif. "An unexpected advance in \*  
\* research points to 300 B as the radionic rate. The finding is based upon fresh \*  
\* urine from patients admitted to the C.D. Ward of a large hospital at the height of \*  
\* the acute stage." - - The BSR will soon issue a brochure by Dr. Edgars on Elec- \*  
\* tronic practise. \*
